The Alberta Game Farm is privately owned and operated, receiving no subsidies or endowments of any kind.
We depend entirely on your patronage for operational expenses.

ALBERTA GAME FARM

Open all year around, weather permitting. Summer—9:00 a.m. till dark; Winter—10:00 a.m. till

Dear Friends,

When we established the Alberta Game Farm we were serious and conscious of the need of public education in relation to the status of our own Canadian wild animals as well as to the animals of the world. We wanted to "present the case" for wild animals, as well as provide the people of Alberta and visitors from other regions the opportunity to become better acquainted with them. At the Alberta Game Farm, visitors are able to pet and hand-feed many animals that normally exist in remote wilds. Here you are able to meet them personally, under circumstances which simulate as closely as possible, their natural habitat. This fascinating world of wild animals can be observed at the Alberta Game Farm under the most pleasant and revealing circumstances.

Sincerely,

AL and MAY OEMING
Owners and Founders

Al Oeming with his pet cheetah "TAWANA" who is always on hand to greet visitors to the Farm.

Don't miss...

THE ALBERTA GAME FARM FUN FOR THE ENTIRE FAMILY

Rare Woodland Caribou
browse in their spacious
bog forest paddock.

Spend the day with us on the farm!

The Alberta Game Farm is located 14 miles east of Edmonton on Highway 14. It comprises 1,000 acres of natural woodlands. The animals are in no sense restricted, but since they are protected, they have become tame and friendly. We take pride in their appearance. Guides are happy to provide the children with food with which to feed the animals. Here, too, a genuine treat is provided for the camera enthusiast.

Summer visitors find the animal nursery a delight. The children share the thrill of feeding and otherwise providing for the baby animals.

The exhibits of muskoxen and wood bison are truly unique; they are observed as in their natural range.

The Alberta Game Farm supplies zoos and public parks throughout the world with various kinds of mammals and birds. Animal exchanges are also made and we import many birds and mammals.

Scientific studies are conducted with various rare animals at the farm and the information gathered is made available to government and scientific bodies in all parts of the world. The Alberta Game Farm has had many notable successes in wildlife breeding in Canada.

Our 35-acre picnic grounds is located on Lost Lake which is a mile and a half long. It is well-furnished with tables and benches and as you lunch outdoors many colorful peafowl, pheasants, ducks, wild geese and deer will invite themselves to your table for any scraps you may have to spare.

The mule train is the only attraction of its kind in Canada. You and your family can enjoy reliving the days of the early pioneer mule-train treks in the west. The train rides daily during the summer.

In this folder we have been able, of course, to give only a glimpse of the many species of wild animals to be seen and enjoyed. There is something new each time you visit the farm. It's fun and educational for the entire family.
